For EPA Team Discussion Only

This is what happens when I start asking questions. Now I have more questions (and planned work in OU3 area).

The City is considering two alternatives for new sewer main connection to the 750 Moffett Blvd (Moffett Gateway property). One alternative includes on the 850 Leong property. Also, the plan is to re-route and reverse the sewer flow at F6-058 to north on Leong to connect to East Trunk at F5-036 onto Moffett Field.

Note: the plan is still to remove the sewer line on the Moffett Gateway property.

Hi Alana:

Please see the attachments regarding the Leong Drive water and sewer main replacements.
